Projects

Radized: Radiology Digitized | *PHP, MySQL, JavaScript, HTML, CSS, AWS, Git*

Jan 2022

- Developed a PHP website with SQL DB that helps doctors provide radiological interpretations to diagnostic centers.
- Reduced time to interpret scans by 80% by optimizing and streamlining scan assignment to doctors.
- Managed the elastic cloud compute instances of the website on Amazon Web Services.

NeoConvo | *PHP, MySQL, R, HTML, CSS, Heroku, Google Search Console*

Apr 2020

- Created a PHP social networking website that allows users to post, message, and connect with other users.
- Managed SQL queries and cron jobs for generic DML queries.
- Organized HTML and XML files to get a better SEO score for higher Google Search rankings.
- Analyzed search trends worldwide for social networking websites and interpreted website statistics via Google Analytics and Google Search Console.
- Used R programming language to provide concise visual representations of statistics.

Flora Counselling Services | *Python, PyQt5, MySQL, CSS*

Apr 2020

- Created a Python application for over 2000 students to make counselling services more accessible in over 10 schools.
- Used PyQt5 to create a GUI that supports actions such as creating an account, editing profile, managing counsellors, scheduling appointments, and viewing usage statistics.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.
